Dear Applicant,

Thank you for your interest in one of the ITI programs. We are excited to start the assessment process with you. Below, you will find important details regarding your upcoming online exam, including the necessary steps to ensure you are fully prepared.

About the Online Exam:
The exam will be conducted using remote proctoring software to ensure integrity and fairness among applicants. This software will monitor and record laptop camera, laptop screen, and microphone.

Preparation and Software Installation:
Before the exam, please watch the instructional video at: Instruction Video. Note that there may be some minor differences between the system used on the video, and the system on our website due to using an older version in the instruction video, but all the steps are the same.

Required Software:
Download and install the AI-Proctor assessment software from https://ai-proctor.com/download/. A Windows 10 or 11 laptop is required. Please uninstall any previous versions if applicable. Also, you need to download AI-Proctor Companion app on your mobile phone.

Testing Your Setup:
Before the exam begins, it is crucial to complete the "preparation exam" to ensure that your setup is functioning properly. If you encounter any issues, please reach out to support@ai-proctor.com. Additionally, have an alternative setup ready (such as another laptop or mobile phone) to ensure a smooth exam experience and to prevent missing the exam time while troubleshooting any problems.

You can access the trial exam by clicking on this link:

https://ai-proctor.com/s/sprent/?eveid=2704BEA25FF101FA47E5AA59/308230100772

Technical support is only available before the exam. Hence, going through the trial test is mandatory. Please try to find a suitable setup that can help you to successfully conduct the trial test.

Preparing for the Exam:

- Ensure a stable Internet connection.
- Have a photo of your ID (national ID or university card) ready in JPEG format not exceeding 5 MB.
- Ensure the exam environment is quiet, well-lit, and free from other individuals. Avoid having any strong source of light or a bright window back of you.

- Remain in the camera's view for the duration of the exam.
- Do not use secondary devices (e.g., second screens, smartphones, tablets) or virtual machines.
- Headphones/headsets are not permitted.
- Please check the instructions for the exam when you try the trial test. Read the instructions carefully to be ready on the exam date!

Assessment Details:

- Assessment Date: Aug, 29th, 2024 (Thursday)
- Assessment Time: 9:30 AM
- Assessment Link:

https://ai-proctor.com/s/sprent/?eveid=2700A9D09096F2E5472EB5EA/308230100772

If you have any issues, please send to support@ai-proctor.com. Note that no support will be provided during the exam day. All technical issues must be solved before the exam day, or you can change your setup to be able to go through the test exam

We wish you the best of luck!
